

SURE CONTROLS

Controls & Systems For Industry

System Integration Services

"Improving performance through instrumentation, automation and controls system design..."

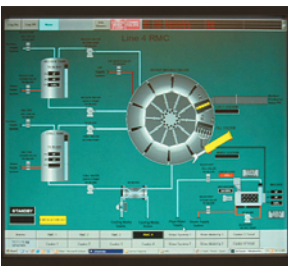

Panel Building Services

- Quality wiring practices make maintenance fast and simple.
- UL Listed panel construction services.
- Field installation, start-up and troubleshooting.

Control System Design Services

- Electrical Design: From electrical prints to parts lists, let us pull your project together.
- PLC / Network Design: Integrate your PLC's across multiple platforms and vendors. Allen-Bradley, Modicon, Omron, Siemens, and others.

System Integration Services

- Drive System Design: AC, DC & Servo coordinated multi-section web control systems, utilizing the latest communications standards, including fiber optic, ControlNet, DeviceNet, Profibus, Ethernet and Modbus.
- HMI, SCADA & Process Visualization: Specializing in Parker InteractX and Interact Xpress, Wonderware Factory Suite tools, Intellution FIX DMACS and iFix, Rockwell RSView.
- Parker Systems Integrator: Turnkey mechanical and electrical motion control design and programming. Specializing in single and multi-axis servo drive controller programming to achieve coordinated motion to meet your repeatability and throughput requirements.
- Rockwell Systems Integrator: Design for systems utilizing PLC 5, SLC 500, Logix Platform as well as all operator interface products.

"Solutions for Today...Visions for Tomorrow"
