ED-220

Parker SSD Drives – 890 Drives & DSE Fundamentals

Duration	2 Days
Prerequisites	Parker SSD Digital AC or DC drives knowledge. Completion of ED-210 or ED-212 or equivalent. Familiarity with Windows XP. Knowledge of drive systems is helpful.
Audience	This course is primarily intended for engineers, electronic technicians, and electricians who are responsible for maintaining and troubleshooting an 890 Drive System.
Cost	\$ 800

Abstract

This course provides the participant with the skills required to maintain and troubleshoot an 890 drive system using the Drive System Explorer software and other tools. Hands-on practice exercises provide practical experience.

Topics

- Operation of a basic 890 AC drive system
- 890 AC drives hardware
- How to use DSE890 software
- How to use Manager software
- Drive configuration in DSE
- Uploading and downloading of configurations
- Basic hardware and software troubleshooting
- And More!

Objective

After completing this course participants will be able to:

- Maintain and troubleshoot an 890 drive system using DSE890 software
- Use Manager to backup and maintain DSE890 Projects.

Tools Provided	Student Manual
Products Covered	Parker SSD Drives 890 Hardware DSE890 Runtime Software
